## I - Executive Summary and Overview

### First Quarter 2016 Market Recap

Overcoming initial volatility, the U.S. stock market (S&P 500) finished the quarter up 1.4% after a strong March offset negative returns in January and February. Dismal global economic figures and plummeting oil prices increased fears of a global and domestic recession and contributed to the initial selloff. However, more optimistic data and dovish language from the Federal Reserve in late February helped the market reverse course. Developed international equity markets (MSCI EAFE Index) were not as resilient, as investors began to question the effectiveness of prolonged negative rates in Europe and Japan.

Emerging Markets (MSCI EM Index), by contrast, recovered well as the falling price of commodities, particularly oil, staged a nice turnaround. The broad fixed income market (Barclays Aggregate Bond Index) was up 3.0%, as interest rates declined and the Fed slowed down its plans for raising interest rates. The unemployment rate held steady at 5.0%, as total employment increased by 628,000 jobs this quarter. Real GDP increased 1.4% in the fourth quarter, after increasing by 2.0% in the third quarter.

Index	1Q 2016
S&P 500 Index	1.35%
MSCI EAFE Index ND	-3.01%
MSCI EM (Emerging Markets) Index ND	5.71%
Barclays Aggregate Bond Index	3.03%

US Equity				Non-US Equity			US Fixed Income				
	Growth	Blend	Value		ACWI ex. US	EAFE	EM		High Yield	Agg	Gov't
Large	0.74	1.17	1.64	Large	-0.79	-3.60	5.81	Short	2.26	1.58	0.48
	0.58	2.24	3.92		1.31	-0.75	5.22		3.09	2.31	2.28
Small	-4.68	-1.52	1.70	Small	0.68	-0.60	0.97	Long	8.06	7.31	8.06

Three month returns ending 3/31/16. US Equity indexes are Russell 1000, 1000 Value and 1000 Growth; MidCap, MidCap Value and MidCap Growth; and 2000, 2000 Value and 2000 Growth. Non-US Equity Indexes are MSCI All Country World Index (ACWI) ex. US Large, Mid and Small Caps; MSCI EAFE Large, Mid and Small Caps, and MSCI Emerging Markets (EM) Large, Mid and Small Caps. US Fixed Income indexes are Barclays Capital (BC) High Yield 1-5 Yr, Intermediate and Long duration; BC US Agg 1-5 Yr, Interim and 10+ Yr; and BC US Gov't Short, Intermediate and Long Durations.

### Outlook

There is evidence that the U.S. economy is improving; however, economic data still offers a mixture of positive and negative signals. On the negative side, the corporate earnings outlook of domestic firms is tepid as demand remains muted both at home and abroad. There is also apprehension about decisions by the European Central Bank and the Bank of Japan to adopt negative interest rates – a move which is intended to spur economic growth but may be creating economic and financial distortions. On the positive side, GDP and employment continued to grow while home prices remained strong. A continued focus on long-term goals and objectives is a prudent course, balancing downside risk at current valuations with the potential for upside performance.

## Quarterly Overview

### ***Miami Beach Employees' Retirement Plan***

#### *Asset Allocation Summary*

- The Miami Beach Employees' Retirement Plan had a total market value of \$525,671,181 as of March 31, 2016, which represents an increase of \$790,385 from the December 31, 2015 market value of \$524,880,796.
- The overall increase in the Plan's market value was the result of -\$9.2 million in net cash flows and net investment gains of \$10.0 million.

#### *First Quarter, 2016 Performance Summary*

##### *Total Plan*

The Employees' Retirement Plan had a return of 2.0% during the first quarter of 2016, and ranked in the 30<sup>th</sup> percentile of the total fund universe. This return exceeded the fund benchmark return of 1.9%. (For periods up to and including the 1st quarter of 1996, the Total Fund benchmark is 50% S&P 500 and 50% Barclays Intermediate Gov't/Corp Index; from 1<sup>st</sup> quarter of 1997 through 1st quarter of 1998, the benchmark is 50% S&P 500 and 50% Barclays U.S. Aggregate Bond Index; from 1<sup>st</sup> quarter of 1999 through the 3<sup>rd</sup> quarter of 2000, the benchmark is 40% S&P 500, 7.5% S&P 400 Mid Cap, 2.5% MSCI EAFE and 50% Barclays U.S. Aggregate Bond Index. From the 1st quarter 2000 through the 1<sup>st</sup> quarter of 2006 the benchmark is 45% S&P 500, 10% S&P 400 Mid Cap, 5% MSCI EAFE and 40% Barclays U.S. Aggregate Bond Index. From 2<sup>nd</sup> quarter 2006 to the 1<sup>st</sup> quarter 2010, the benchmark is 45% S&P 500, 10% S&P 400 Mid Cap, 5% Russell 2000®, 7% MSCI EAFE and 33% Barclays U.S. Aggregate. From 2<sup>nd</sup> quarter 2010, the benchmark is 39% S&P 500, 8% S&P 400, 4% Russell 2000, 18% MSCI EAFE and 31% Barclays US Aggregate Bond Index). Beginning in the 4<sup>th</sup> quarter of 2014, the benchmark is 39% S&P 500, 8% S&P 400, 4% Russell 2000, 13% S&P ADR, 11% Barclays US Aggregate Bond Index, 20% Barclays Intermediate Aggregate, and 5% MSCI Emerging Markets.)

##### *Equity Portfolios*

- The Rhumblin Advisors S&P 500 Index fund returned 1.3% during the quarter, which matched the return of the S&P 500.
- The PIMCO StockPlus Total Return Fund returned 1.1% in the first quarter; which was below the S&P 500 return of 1.3%.
- The Rhumblin Advisors S&P 400 Mid Cap Index portfolio had a first quarter return of 3.7% which slightly trailed the S&P 400 return of 3.8%.
- The Rhumblin Advisors S&P 600 small capitalization index portfolio had a first quarter return of 2.6%, which also trailed the performance of the S&P 600 Small Cap Index at 2.7%.

##### *Fixed Income Portfolios*

- The Rhumblin Barclays U.S. Aggregate bond fund returned 3.0% in the first quarter. This return matched the Barclays U.S. Aggregate Index return and ranked in the 48<sup>th</sup> percentile.
- The Wellington fixed income portfolio returned 2.5% during the quarter, which was above the 2.3% return of the Wellington Benchmark and ranked in the 69<sup>th</sup> percentile.

#### *International Equity Portfolios*

- The Rhumblin ADR portfolio returned -1.7% during the first quarter, slightly below the -1.6% return of the S&P ADR Index, and above the MSCI EAFE of -3.0%. The portfolio ranked in the 60<sup>th</sup> percentile of international equity managers.

#### *Emerging Markets*

- DFA returned 7.4% in the first quarter, performing above the 5.7% return of the MSCI Emerging Markets Benchmark. This return ranked in the 17<sup>th</sup> percentile of emerging markets equity portfolios.

#### *Real Estate*

- The JP Morgan Strategic Property Fund had a first quarter return of 1.6%, which was below the ODCE Index return of 2.2%.

## **II - Asset Allocation and Asset Growth Review**

### **Comments on Asset Allocation**

- The Miami Beach Employees' Retirement Plan had a total market value of \$525,671,181 as of March 31, 2016, which represents an increase of \$790,385 from the December 31, 2015 market value of \$524,880,796.

#### *Net Contributions/Withdrawals*

- Net cash flows totaled approximately -\$9.2 million during the first quarter. The Rhumblin Advisors S&P 500 had a withdrawal of \$3.0 million, the Rhumblin Aggregate had a withdrawal of \$6.4 million, the Rhumblin ADR had a withdrawal of \$30,000, and the trust account had a net contribution of \$241,000.

#### *Investment Gains/Losses*

- During the first quarter of 2016, the Retirement Plan experienced a net investment gain of approximately \$10.0 million. The Retirement Plan's domestic equity managers posted a first quarter investment gain of \$3.9 million; the international equity portfolios posted a gain of \$815,000. The fixed income managers posted a gain of \$4.3 million, and the Real Estate manager posted a gain of \$1 million.

#### *Current Actual Asset Allocation*

- As shown in the *Actual & Target Asset Allocation* table, as of March 31, 2016, the Retirement Plan had an allocation of 31.4% to the large cap domestic equity managers, 7.1% to mid cap equity, 4.0% to small cap equity, 30.5% to domestic fixed income, 10.4% to international equity, 5.0% to emerging markets, 11.4% to Real Estate, and 0.1% to cash equivalents.
- Relative to December 31, 2015, the Retirement Plan had a lower allocation to the large cap domestic equity managers (31.4% vs. 31.7%), International Equity (10.4% vs. 10.6%) and Fixed Income (30.5% vs. 31.0%). The funds mid cap allocation increased from 6.9% to 7.1%, as well as small cap, which increased from 3.9% to 4.0%. Emerging Markets also increased from 4.7% to 5.0%. The funds Real Estate allocation changed from 11.2% to 11.4%.

### **III - Performance Review**

#### **Comments on Investment Manager Performance**

##### ***Total Fund Performance***

- The Employees' Retirement Plan had a return of 2.0% during the first quarter of 2016, and ranked in the 30<sup>th</sup> percentile of the total fund universe. This return was slightly above the benchmark return of 1.9%.
- Over the past year, the Retirement Plan's return of -0.2% is above the -1.3% return of the Plan's benchmark and ranked in the 31<sup>st</sup> percentile in the universe of total funds.
- Total Plan returns were above the benchmark over the 3 month, 1 year, 2 year, and since inception time periods. Total Plan returns were slightly below over the 3, 4, 5, and 7 year periods.
- Since inception (January 1994) the Plan has returned 7.9% versus 7.6% for the total fund benchmark.

##### ***Equity Portfolio Performance***

###### ***Rhumblin Advisors – S&P 500***

- The Rhumblin Advisors' S&P 500 Index portfolio returned 1.3% in the quarter and matched return of the S&P 500 while ranking in the 70<sup>th</sup> percentile of passive large cap equity managers.
- Over the past year, the portfolio has returned 1.7%, slightly trailing the 1.8% return of the S&P 500, and ranked in the 94<sup>th</sup> percentile.
- Longer term performance results are similar to the index, which extend to April, 1997.

###### ***PIMCO StockPlus Total Return***

- PIMCO StockPlus portfolio returned 1.1%, which was below the S&P 500 index return of 1.3%. PIMCO's first quarter performance ranked in the 39<sup>th</sup> percentile in the universe of large cap core equity portfolios. For the one year period, PIMCO returned -1.4% versus the S&P 500 at 1.8% and ranked in the 64<sup>th</sup> percentile. Over the past two years, PIMCO has returned 6.2% versus the benchmark of 7.1% and ranked in the 48<sup>th</sup> percentile. Three year results for PIMCO were 11.0%, versus 11.8% for the S&P 500. This return ranked in the 62<sup>nd</sup> percentile.

###### ***Rhumblin Advisors – S&P 400 Mid Cap***

- The Mid Cap index portfolio managed by Rhumblin returned 3.7% in the first quarter, slightly trailing the 3.8% return of the S&P 400 Mid Cap benchmark. The first quarter return ranked in the 61<sup>st</sup> percentile of passive Mid Cap equity managers.
- Over the past year, the portfolio has returned -3.6%, matching the index return, and ranked in the 15<sup>th</sup> percentile.
- Longer term results are comparable to the index.

#### *Rhumblin Advisors – S&P 600 Small Cap*

- The Rhumblin Advisors' small cap index portfolio returned 2.6% in the first quarter, slightly trailing the 2.7% return of the S&P 600 Small Cap benchmark. The first quarter return ranked in the 1<sup>st</sup> percentile of passive small cap equity managers. Over the past year the fund returned -3.2%, matching the benchmark return and ranking in the 1<sup>st</sup> percentile.
- Longer term results are similar to the Index, which extend to January, 2007.

#### **Fixed Income Portfolio Performance**

##### *Rhumblin Barclays U.S. Aggregate*

- The Rhumblin fixed income index account returned 3.0% in the quarter, matching the Barclays U.S. Aggregate return of 3.0% and ranked in the 48<sup>th</sup> percentile of fixed income portfolios.
- Over the past year, the account has returned 2.1%, above the 2.0% return of the Barclays U.S. Aggregate and ranking in the 52<sup>nd</sup> percentile of fixed income portfolios.
- Longer term results are comparable to the benchmark.

##### *Wellington Management*

- The Wellington Management portfolio's first quarter return of 2.5% was above the benchmark return of 2.3% and ranked in the 69<sup>th</sup> percentile in the universe of fixed income portfolios. (For periods up to and including 1<sup>st</sup> quarter 1997, the Barclays Intermediate Gov't/Corp. Bond Index is the benchmark, and for subsequent periods through the 1<sup>st</sup> Quarter of 2013, the benchmark is the Barclays U.S. Aggregate Bond Index. Starting during the 2<sup>nd</sup> quarter of 2014, the benchmark became the Barclays Capital Intermediate Aggregate Bond Index).
- Over the past year, Wellington's return of 1.7% was below the 2.2% return of the benchmark and ranked in the 25<sup>th</sup> percentile. Two and three year results also trail the benchmark.
- Longer term results exceed or equal the benchmark, which extend back to October, 1993.

#### **International Equity Portfolio Performance**

##### *Rhumblin Advisors*

- Rhumblin's ADR portfolio returned -1.7% in the first quarter, slightly below than the -1.6% return of the S&P ADR Index and ranked in the 60<sup>th</sup> percentile of the international equity universe.
- Over the past year, Rhumblin's ADR portfolio returned -11.5%, and was above the return of the S&P ADR Index of -11.8%. This return ranked in the 98<sup>th</sup> percentile. Three, four, and five year returns are also above the benchmark.

##### *Dimensional Fund Advisors*

- DFA's Emerging Market Core equity portfolio returned 7.4% during the first quarter, outperforming the 5.7% return of the MSCI Emerging Markets benchmark, and ranking in the 17<sup>th</sup> percentile.
- One year results are -9.9% versus -12.0% for the benchmark. Since inception results are also better than the benchmark (-9.2% vs. -10.9%).

### ***Real Estate Portfolio Performance***

#### ***JP Morgan***

- The JP Morgan Strategic Property fund had a first quarter return of 1.6%, which was below the return of the NACREIF ODCE benchmark of 2.2%. Returns since inception, August 2015, are 7.5%, versus the NACREIF ODCE benchmark of 8.2%.

### ***Investment Management Fee Summary***

- In the first quarter of 2016, investment management fees reduced performance for all Rhumblin Advisor accounts by approximately 1 bp, Pimco by 6 bps, Wellington by 7 bps, JP Morgan by 25 bps, and DFA by 16 bps. These results are similar to previous quarters and are as expected.

Fund Assets (\$mm)	528.52
Share Class Inception Date	6/28/2002
Manager Tenure	2

## Return Summary Ending March 31, 2016

## Description:

The investment seeks total return which exceeds that of the S&P 500 Index.

The fund seeks to exceed the total return of the S&P 500 Index by investing under normal circumstances in S&P 500 Index derivatives, backed by a portfolio of Fixed Income Instruments. "Fixed Income Instruments" include bonds, debt securities and other similar instruments issued by various U.S. and non-U.S. public- or private-sector entities.

## Sector Allocation as of 12/31/2015

**Description of Managers' Investment Philosophy, Process & Style**

---

**PIMCO StockPlus Total Return**

The Fund seeks to exceed the total return of the S&P 500 Index by investing under normal circumstances in S&P 500 Index derivatives, backed by a portfolio of Fixed Income Instruments. Fixed Income Instruments include bonds, debt securities and other similar instruments issued by various U.S. and non-U.S. public- or private-sector entities. The Fund may invest in common stocks, options, futures, options on futures and swaps. The Fund normally uses S&P 500 Index derivatives instead of S&P 500 Index stocks to attempt to equal or exceed the daily performance of the S&P 500 Index. The Fund typically will seek to gain long exposure to its benchmark index in an amount, under normal circumstances, approximately equal to the Fund's net assets. The value of S&P 500 Index derivatives should closely track changes in the value of the S&P 500 Index. However, S&P 500 Index derivatives may be purchased with a small fraction of the assets that would be needed to purchase the equity securities directly, so that the remainder of the assets may be invested in Fixed Income Instruments. Pacific Investment Management Company LLC (PIMCO) actively manages the Fixed Income Instruments held by the Fund with a view toward enhancing the Fund's total return, subject to an overall portfolio duration which normally varies from (negative) 3 years to positive 8 years based on PIMCO's forecast for interest rates. Duration is a measure used to determine the sensitivity of a security's price to changes in interest rates. The longer a security's duration, the more sensitive it will be to changes in interest rates. The S&P 500 Index is composed of 500 selected common stocks that represent approximately two-thirds of the total market value of all U.S. common stocks. The Fund seeks to remain invested in S&P 500 Index derivatives or S&P 500 Index stocks even when the S&P 500 Index is declining. Though the Fund does not normally invest directly in S&P 500 Index securities, when S&P 500 Index derivatives appear to be overvalued relative to the S&P 500 Index, the Fund may invest all of its assets in a basket of S&P 500 Index stocks. The Fund also may invest in exchange-traded funds based on the S&P 500 Index, such as Standard & Poor's Depositary Receipts.

**RhumbLine Advisers S&P 500 Index**

RhumbLine initially managed the portfolio construction process by screening the stocks and eliminating those which do not have an acceptable quality rating by Value Line or Standard & Poor's, as well as companies not domestically domiciled. The screening excludes approximately 70 securities from the High Grade Index. This version of the Index was converted to a fully-replicating Index Fund in the 1st quarter of 2000.

To minimize tracking error, RhumbLine frequently rebalances the portfolio. There are three events which will trigger rebalancing. These events are:

- Cash accumulates to 1% of the assets
- Changes in the benchmark securities or restricted list
- Major market changes

This policy results in portfolio rebalancing as often as each week, and no less often than each quarter. Each time this "micro-rebalancing" occurs, a list of required buys and sells, with acceptable alternative trades is produced which will bring the portfolio back into compliance with the S&P 500 Index. Typically, these trades represent less than 10% of the individual names in the portfolio, with less than 5% of the available assets. Historically, turnover has averaged less than 6%. In addition to frequent portfolio rebalancing, daily industry-sector weighting reports are reviewed to assure the portfolio is replicating risk and return characteristics of the S&P 500 Index.

**RhumbLine Advisers S&P 400 Mid Cap Index**

The portfolio for the Rhumbline S&P 400 Mid-Cap Index Fund has a construction and management process similar to that of the S&P 500 Index Fund. The methodology is a combination of a replication and stratification sampling process. The portfolio will hold approximately 375 issues. About 95% of the index, or 320 of the largest stocks in the index, are held in replicating weights. The remaining 5% are sampled; approximately 54 out of 80 stocks are held at weights of 0.10%. The sampled stocks are chosen so that industry weights of the index match industry weights of the portfolio.

**RhumbLine Advisers S&P 600 Small Cap Index**

The portfolio for the Rhumbline S&P 600 Small-Cap Index Fund has a construction and management process similar to that of the S&P 500 Index Fund. The fund consists of 600 small-cap stocks trading in the U.S with a market capitalization range between \$250 million to \$900 million. This represents approximately 3% of the domestic equity universe. The Fund has an annual turnover rate of 8 - 10%.

**RhumbLine Advisers Barclays U.S. Aggregate Index**

The RhumbLine investment team utilizes fixed income investment modeling technology to build and maintain the Core Bond Pooled Index Fund. As the objective of the Fund is to track the risk and return characteristics of the Barclays U.S. Aggregate Bond Index, all investment decisions are made with that as the primary goal. The benchmark has more than 6,000 fixed income instruments to select from so their process incorporates both optimization and stratified sampling in managing the Fund. Other analytical tools are utilized to evaluate fundamental credit research, market analysis of supply and demand and security structure analysis.

**Wellington Management Company**

Wellington Management Company manages a Barclays U.S. Intermediate Aggregate-based fixed income portfolio with an added High Yield component that is authorized to invest up to 20% in High Yield securities for the Miami Beach Employees' Retirement Plan. The objective of the portfolio strategy is to exceed the return of the Barclays U.S. Aggregate Total Bond Index through investments in intermediate and longer maturity, investment grade fixed income securities plus a High Yield component. Average maturity of the bond portfolios is typically between 8 and 12 years. Average duration ranges from 4 to 6 years, depending on the firm's interest rate outlook.

Intermediate Aggregate Bond portfolios typically emphasize corporate and mortgage securities over government and agency securities. The actual weighting of corporate and mortgage securities is a function of yield spreads and the firm's market outlook. Portfolio yield tends to be slightly higher than the Barclays U.S. Intermediate Aggregate Bond Index, while quality is typically slightly lower due to the emphasis on corporate issues.

The maturity/duration strategy decision is based on both macroeconomic data and bond market indicators. Changes in portfolio strategy normally occur slowly, rather than in sudden, large shifts. Wellington's strategic approach is somewhat contrarian; they tend to gradually increase portfolio duration as rates rise and vice versa.

Bond sector strategies focus on relative value and yield spreads across security types and among quality, issuer and industry sectors. Analysis of historical yield spreads is also used in establishing the sector strategy. Additionally, quality yield spreads are monitored for swap opportunities. The Bond strategy is supported by two groups within the company which supply fundamental and valuation information on two of the major domestic market sectors. These groups are the Mortgage Backed Strategy Group, and the Credit Screening Group.

**Wellington Management Company (continued)**

Wellington's corporate bond research effort is distinctive in that it focuses on avoiding down-gradings as well as on evaluating default risk. The fixed income research effort results in a Bond Universe of issuers pre-approved for purchase. Only securities issued by companies on the Bond Universe list may be included in the portfolio. The Investment Grade Bond Universe includes approximately 350 corporate debt issuers selected out of 700 investment grade bond issuers who have at least \$50 million of public debt outstanding.

**RhumbLine Advisers ADR Index**

Rhumbline manages a portfolio to track the performance of the Standard & Poor's ADR Index. The investment objective is to generate a total return that falls within a range of +/- 15 basis points (0.15%) of the return of the index over both a short (1 to 3 years) and long (3 to 5 years) term investment horizons. The portfolio utilizes a full replication methodology which effectively holds all the securities in the benchmark. The portfolio holdings are monitored to keep sector allocations, market capitalizations and country weights in line with the index.

**Dimensional Fund Advisors Emerging Markets Core**

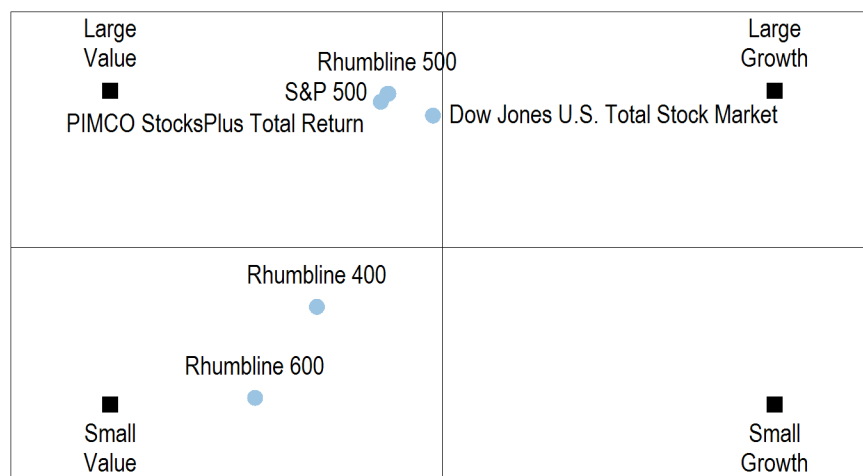

The Emerging Markets Core Equity Portfolio is a no-load mutual fund designed to achieve long-term capital appreciation. The Portfolio seeks to purchase a broad and diverse group of securities with an increased exposure to securities of small cap issuers and securities that it considers to be value securities. In assessing value, Dimensional may consider factors such as the issuer's securities having a high book value in relation to their market value, as well as price to cash flow or price to earnings ratios. The criteria for assessing value are subject to change from time to time. The Portfolio invests in securities associated with a diverse group of countries, which may include both emerging and frontier markets, that Dimensional has designated as approved markets.

**JPMorgan Strategic Property Fund**

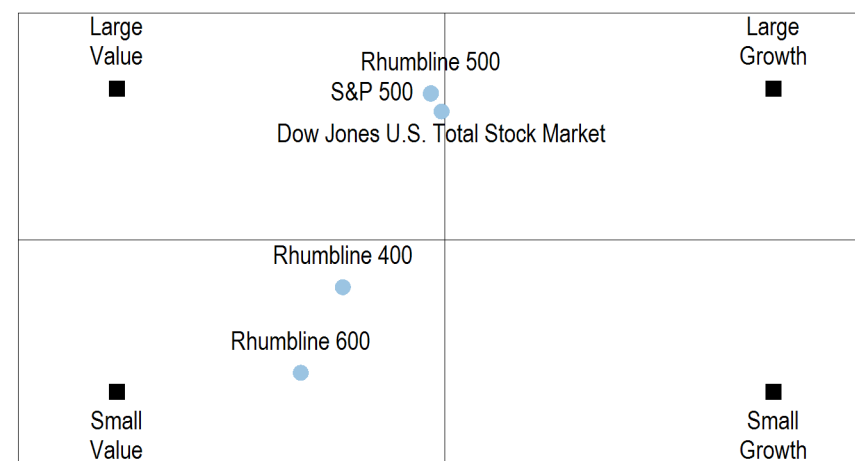

The Strategic Property Fund investment philosophy is based on the belief that consistently excellent investment results can be achieved by investing in a diversified portfolio of dominant, high-quality assets while maintaining a low risk profile across the portfolio. The Fund's research-based portfolio construction process leverages the information advantage created by in-depth real estate expertise and firm-wide research capabilities.

The Fund invests in high-quality stabilized office, retail, residential and industrial assets with dominant competitive characteristics in primary markets with attractive demographics throughout the United States. Properties are well-leased generating significant operating cash flow and a high income return. The Fund does not invest in higher risk sectors such as hospitality, assisted living, self-storage, etc. New development is minimal. When presented with the right opportunity, the Fund will selectively capitalize on development opportunities in order to enter or extend the Fund's presence in key markets with high quality assets but not exceed the Fund's maximum new development guideline of 5%. The Fund seeks to outperform the NCREIF Fund Index – Open End Diversified Core Equity Index ("NFI-ODCE" or "ODCE") through asset, geographic and sector selection and active asset management.

<b>Real Estate Portfolios</b>				
JP Morgan Strategic Property Fund	1.6	1.9	2.2	-0.2

\*Performance difference for the JP Morgan Strategic Property Fund is due to 4th quarter fees being accounted for in the first quarter of 2016.

**Coupon-** Bond instruments typically pay interest in the form of semi-annual coupon payments. If the annual coupon payment value is divided by the par value of the bond, the coupon rate is derived.

**Duration-** The bond portfolio duration most commonly referred to is the Macaulay duration. This is a weighted average maturity, expressed in years. All coupon and principal payments are weighted by the present value term for the expected time of payment.

**Investment Gain/Loss-** The difference in the total dollar value of the portfolio over the past quarter. Changes impacting the dollar value of the portfolio include realized and unrealized capital gains and all cash flows. Cash flows, either contributions or withdrawals, which are made by the plan sponsor are excluded from this calculation.

**Income Yield-** As referred to in this report, the income yield is calculated on common stock holdings, and is the ratio of the last twelve months dividend payments as a percentage of the most recent quarter-ending stock market value.

**Market Capitalization-** A security's quarter-ending market value or closing price times the number of common stock shares outstanding.

**Maturity-** The maturity for an individual bond is calculated as the number of years till principal payment. For a portfolio of bonds, the maturity is a weighted average maturity, where the weighting factors are the individual security's percentage of total portfolio market capitalization.

**Percentile-** For a range of investment manager performance results, from highest to lowest, a percentile is the performance range spanning one percent of the total range.

**Price/Book Value-** For an individual common stock, this is the stock's price divided by book value per share. Book value per share is the company's common stockholder's equity divided by the number of common shares outstanding.

**Price/Earnings Ratio-** The ratio of a common stock's price divided by earnings per share. The ratio is used as a valuation technique employed by investment managers.

**Net Contributions-** The sum of contributions to and withdrawals from a portfolio, exclusive of regular interest and dividend payments, and miscellaneous expenses.

**Portfolio Beta-** A common stock's beta, market risk, is the sensitivity of the stock's price in relation to a 1% change in the price of the market benchmark, the S&P 500. A portfolio beta simply weights the individual issues by their percentage of total portfolio market capitalization.

**Return on Equity-** For a common stock, this is the annual net, after-tax earnings divided by total common stockholder's equity.

**Risk/Reward (Sharpe) Ratio-** This is the difference in a portfolio's annualized return, for the past five years, and the annualized return for 90-day Treasury Bills, divided by the annualized standard deviation for the same time period. The statistic is a risk-adjusted return. The higher the value the better.

**Standard Deviation-** The degree of variability of a time series, such as quarterly returns, relative to the average. Standard deviation measures the volatility of the time series.
